

From the onset of our kitchen renovation Krystal was able to grasp our ideas and turn them into a functional and practical user friendly kitchen.

She was so helpful in the design stage of which cupboards, drawers etc to be placed in the various work areas and advise on the materials that would suit our kitchen and our budget.

Her expertise and design skills came to the fore when we were choosing the colour scheme, especially which shade of white (we didn't realise how many shades of white there were) that we should use. We were not aware of the reflective properties of the colours we were considering until Krystal explained the differences to us with her professional attitude which was most outstanding without being intrusive and forceful.

We would highly recommend Krystal to undertake the design for any kitchen renovation that anyone is considering.

She's the best in the West!!
